Authors submitting a manuscript to JMSJ must adhere to the guidelines presented in this document.

Contents

1. Editorial Policies
2. Peer Review and Editorial Procedures
3. Submission Guidelines
4. Procedure after Acceptance

The Meteorological Society of Japan (MSJ) was founded in 1882 to promote the progress and development of meteorological research. Journal of the Meteorological Society of Japan (JMSJ) is an international journal featuring significant original research and reviews in meteorology. Series I of JMSJ was published between 1882 and 1922, and Series II has been published since 1923. JMSJ has been published entirely in English since 2001. The articles in the journal are selected carefully by thorough peer review based on the latest scientific knowledge.

In 2018, JMSJ switched to fully Open Access publication. All articles published from 2018 will be freely available online under the Creative Commons Attribution 4.0 International (CC BY 4.0) license. This license allows users to adapt, reproduce and distribute JMSJ articles (even commercially) in any medium, provided they give appropriate credit to the author(s) and original source, include a link to the license, and indicate if any changes have been made, without the need to ask prior permission from
the MSJ. Authors will be required to sign a License to Publish to grant the MSJ permission to reproduce the work in the journal under the CC BY 4.0 license.

1. Editorial Policies

1. Name

The journal’s name is “Journal of the Meteorological Society of Japan”. This may be cited as “J. Meteor. Soc. Japan” and abbreviated for convenience as JMSJ.

2. Aims and scope

JMSJ publishes Articles and Notes and Correspondence that report novel scientific discoveries or technical developments that advance understanding in meteorology and related sciences. The journal’s broad scope includes meteorological observations, modeling, data assimilation, analyses, global and regional climate research, satellite remote sensing, chemistry and transport, and dynamic meteorology including geophysical fluid dynamics. In particular, JMSJ welcomes papers related to Asian monsoons, climate and mesoscale models, and numerical weather forecasts. Insightful and well-structured original Review Articles that describe the advances and challenges in meteorology and related sciences are also welcome.

JMSJ encourages authors to include the data underlying their work as supplementary material. These data, which must be under 50MB, may describe observations, experiments, modeling or analyses and may take the form of databases, simulations, movies, large figures or as otherwise appropriate.

As an international journal in the meteorological science community, JMSJ maintains a high standard of peer review and offers readers worldwide the benefit of articles being freely available online.

Articles are scientific reports of original findings with complete discussions. Articles should be less than 18,000 words (approximately 60 pages when formatted using the JMSJ word template), with an appropriate number of tables and figures. References should be cited only if they relate directly to the content of the manuscript.

Notes and Correspondence are short reports of up to 4,500 words (approximately 15 pages when formatted using the JMSJ word template) that describe original findings as either an “Express Note” or a “Comment and Reply”. Comments on papers published in JMSJ, and any responses from the authors of those papers, are included in the latter subtype. Notes and Correspondence are intended to be published rapidly, and final editorial decisions on their suitability for publication will be made within four months of manuscript submission.
Invited Review Articles are original comprehensive reviews of subjects deemed topical and important by the Chief Editor. They are typically no more than 20 printed pages in length, but their size and scope can be negotiated between the author(s) and the Chief Editor.

3. Regular Issues, Special Issues, and Special Editions
Regular Issues: The Editors in charge proposes acceptance or rejection of submitted manuscripts to the JMSJ Editorial Committee, which makes the final decision on their suitability for publication. Accepted articles are published within about four months of manuscript submission.

Special Editions: Articles in a specific field are grouped together and published in a Regular Issue. A Special Edition Editorial Committee is organized, and its members select and review manuscripts. The scientific quality of Special Edition articles is equal to or greater than that of Regular Issue articles.

Special Issues: Selected articles in specific subject areas are published as and when decided by the Editorial Committee. An Editorial Committee of Special Issues is convened, and the members select manuscripts and perform peer reviews. Technical editing and all other operations are the responsibility of the Editorial Committee of Special Issues. All expenditures are completely independent from a Regular Issue. The scientific level of the articles should be higher than that of a Regular Issue.

4. Archives
The electronic versions of published articles are stored at Japan Science and Technology Information Aggregator, Electronic (J-STAGE), and are available free of charge to anyone with Internet access.

5. Copyright and Licensing
For papers published from January 1, 2018, the copyright of manuscripts will be retained by the authors; authors will be required to sign a License to Publish form which allows the MSJ to publish the article. For manuscripts published before 2018, the copyright belongs to the MSJ.

When quoting part or all of any article published in JMSJ, an author must refer to the original JMSJ publication. When reproducing part or all of an article or figure published in JMSJ, authors must follow the terms of each article’s license and/or the MSJ’s regulations. More information on copyright and permissions can be found on the JMSJ website.

6. Editorial Committee
In order to edit and publish the journal, the MSJ has established an Editorial Committee comprising
the Chief Editor, Co-Chief Editor, and Editors. The Chief Editor, who is nominated by the Society’s Executive Board members, is responsible for appointing and managing the Co-Chief Editor and Editors. The JMSJ Editorial Committee makes the final decision regarding article acceptance. The JMSJ Editorial Committee is also responsible for the management of the journal.

7. Research and Publication Ethics

The JMSJ seeks to uphold the highest ethical standards in both research and publication.

a) Conflicts of Interest
JMSJ recognizes that it is vital for there to be transparency around any real or perceived conflict of interest regarding papers published in the journal. A conflict of interest exists when judgement about one interest might be influenced by another secondary interest. This can extend to any financial consideration, academic competition and rivalry, personal rivalry or intellectual incompatibility. Conflicts of interest extend to all participants in the peer review process: authors, reviewers, Editors, and Editorial Board members.

Any real or perceived conflicts of interest by any of the participants in the publication process must be considered while undertaking their respective tasks for JMSJ. If relevant, they should be declared clearly to the relevant authority.

Authors should declare in their cover letters whether they have any conflicts of interest (financial or otherwise). If so, the Editor will determine the course of action. Reviewers are asked to declare any potential conflicts of interest and recuse themselves if the potential for bias exists.

The Editors and Editorial Board undertake to declare their conflicts of interest when handling manuscripts for publication.

b) Duplicate Submission
Authors must not have submitted their manuscript to another journal before the Editorial Committee makes the final decision on suitability for publication for JMSJ. If there is an indication of duplicate submission, the Editorial Committee will investigate further and will reject immediately in cases where duplicate submission is confirmed. The journal screens accepted articles for originality before publication using the iThenticate service (ithenticate.com). Authors may submit their manuscripts to another journal freely after withdrawal or rejection from JMSJ.

c) Images and data
Images, especially graphics files, which are included in a manuscript for review should not be processed except for necessary guides for readers (e.g., labels or arrows, etc.). If manipulation is necessary, it should be applied to the entire image and any changes should be noted in the manuscript. Any data associated with images or other aspects of the manuscript must be retained and provided upon request.

2. Peer Review and Editorial Procedures
Peer review of submitted manuscripts is performed through the ScholarOne platform, which is operated by the Japan Science and Technology Agency for the submission and review of papers. Authors may request withdrawal of their submitted manuscripts from consideration at any time. The final decision on the suitability of publication of each manuscript is made by the Editorial Committee.

1. Submission
Manuscripts are submitted to the Chief Editor of JMSJ through ScholarOne. Each manuscript must be accompanied by a cover letter. During the submission process, authors can provide the names and e-mail addresses of up to five potential reviewers and the preferred Editor in charge. The License to Publish form, which must be signed by all authors, should be sent by postal mail or fax to the JMSJ Editorial Office. The date of receipt is the day on which the Editorial Office receives the manuscript.

2. Assignment of Editor in Charge
The Chief Editor examines each submitted manuscript and assigns one Editor to take charge of the peer review process. The JMSJ Editorial Office informs the authors of the date of receipt, the assigned manuscript number, and the name of the Editor in charge.

3. Preliminary Evaluation
If a manuscript does not follow the Submission Guidelines or its contents or language does not meet the scientific standards of JMSJ, the Editor in charge has the right to propose the rejection of the manuscript to the Editorial Committee before the peer review process begins. Both the authors and the Chief Editor are notified of the rejection. The Editor in charge may request corrections before peer review in cases when a manuscript does not meet the standards of JSMJ or the text expression is not clear.

4. Selection of Reviewers
The Editor in charge selects at least two reviewers who are able to evaluate the manuscript. The Editor considers the author’s suggestions of potential reviewers, but does not necessarily follow them. After
reviewers accept the invitation to review a manuscript, the Editor in charge forwards the manuscript to them.

5. Peer Review
Reviewers are asked to evaluate the manuscript using the ScholarOne Referee Form to maintain a common scientific standard for manuscript evaluation and report their feedback to the Editor in charge. The review process must be completed within three weeks for Notes and Correspondence, one month for Articles, and two months for Invited Review Articles.

6. Decision of the Editor in Charge
After considering the reviewers’ reports, the Editor in charge makes a decision on the manuscript (rejection, acceptance after revision, or acceptance). If the paper’s reviewers are divided in their opinions, the Editor in charge will make a decision based on his/her own assessment of the paper.

7. Revising the Manuscript
The Editor in charge returns the reviewers’ evaluations and comments to the author, along with the Editor’s own evaluation and suggestions, and asks for a prompt and appropriate revision of the manuscript. Revisions must be completed within three months for Articles and Invited Review Articles. Notes and Correspondence should be revised rapidly enough for the Editor to make a final decision within four months of the original submission.

8. Withdrawal
If authors would like to contribute their manuscript to another journal, they must first withdraw it from JMSJ. Authors have the right to withdraw their manuscript from JMSJ at any time before the Editorial Committee has made the final decision. If authors do not submit their revised manuscript by the specified deadline, the manuscript is automatically regarded as having been withdrawn from submission. If submitted, the revised manuscript will be treated as a new submission.

9. Editor’s proposal
After reading the reviewers’ reports, including their recommendations and evaluations, the Editor in charge communicates his/her proposal to the Editorial Committee on whether to accept or reject the manuscript. To be accepted, the manuscript must show novel scientific values or technical developments with a logical structure. When the scientific value is low, a mistake in logic is found, or the appropriate quality cannot be attained in the available timeframe, the Editor may propose rejection. The Editor in charge may inform the authors that he/she is going to propose rejection to the Editorial Committee so that the authors can withdraw the paper before the Editorial Committee makes a decision.
10. Final Decision at the Editorial Committee Meeting

The Editorial Committee members discuss the Editor in charge’s proposal and make the final decision regarding publication of the manuscript. The notice of final decision is sent to the author from the Chief Editor through ScholarOne. The date of receipt of the final manuscript is the date on which the Editor in charge receives the final form.

11. Source File Submission

Authors are requested to submit the source files for the final form of their manuscript through ScholarOne, which is necessary for high-quality printing. After submitting the final files, the authors should not make any substantive changes unless requested by the Editorial Committee.

12. English and Technical Editing

English editing of manuscripts is managed by the Editorial Office. The final manuscript is forwarded to a copy editor, and then to the technical editor in the Editorial Office, who ensures that it conforms to the JMSJ format. The manuscript is then sent to the production company.

13. Galley Proofreading

Galley proofs together with the copy edited and technically edited manuscript are sent by the production company to the corresponding author, who should check them and return them to the production company with any corrections. Such corrections marked on the galley proofs are then incorporated into the master galley by the production company, and the technical editor confirms the author’s corrections during proofreading.

14. Publication in the Journal

JMSJ articles are normally published within four months of acceptance. The production company produces PDF files of all manuscripts and provides them to J-STAGE for online publication. The production company handles reprints on request.

15. DOI

JMSJ publications are given a DOI in the following format:

doi:10.2151/jmsj.vvvv-wwww

where vvvv indicates the year of publication, and www indicates the article number in order of acceptance. Article numbers of papers for Special Issues and Special Editions are numbered consecutively.

Example: the first accepted article in 2016: doi:10.2151/jmsj.2016-001
16. Errata and Corrigenda
If a mistake is found in a published article, the author, the Editorial Office, or the production company prepares a corrected manuscript and submits it to the Editorial Committee. After the Editorial Committee agrees that the corrected manuscript should be published, it is published as an Erratum or a Corrigendum. An erratum is used for mistakes/errors caused or made by the publisher while a corrigendum is used for author errors.

3. Submission Guidelines
1. Submission of Manuscripts
Authors are encouraged to submit manuscripts online via ScholarOne, the online manuscript submission system provided by the Japan Science and Technology Agency at http://mc.manuscriptcentral.com/jmsj. The maximum total file size is 50MB. Authors should read and adhere to policies and procedures outlined in this Guide for Authors before submission. Manuscripts and cover letters should be prepared according to the instructions in the Submission Guidelines. For more information, please contact the Editorial Office of JMSJ:

Editorial Office, Journal of the Meteorological Society of Japan  
The Meteorological Society of Japan  
c/o Japan Meteorological Agency  
1-3-4, Ote-machi, Chiyoda-ku, Tokyo 100-0004 JAPAN  
Tel: +81-3-3216-4403, Fax: +81-3-3216-4401  
jmsj@metsoc.jp

2. Manuscripts to be Published
Authors who wish to publish manuscripts are encouraged to submit their work as an Article or a Note. Authors who wish to comment on a manuscript published in the journal are encouraged to submit it as a Comment, and the authors of the commented manuscript will be invited to submit a Reply. Submission of Invited Review Articles is requested by the Chief Editor based on recommendations from the Editorial Committee. Authors of Invited Review Articles may add co-authors if necessary, after obtaining approval from the Editorial Committee.

All manuscripts reporting original research should:

a) Contain observations, experiments, data analyses, numerical models, or theory concerning the basis and application of meteorology.
b) Contain new findings with scientific value or technical developments, obtained by the authors themselves.
c) Have logically explained conclusions.
d) Be written in clear and concise English.

3. License to Publish (For Articles Published from January 1, 2018)
The License to Publish (LTP) form must be uploaded to ScholarOne or sent by e-mail, postal mail or fax to the Editorial Office. The LTP form must be signed by all authors; two or more sheets may be used if necessary. Authors whose work is created as an official employee of any government must send an LPT form for government employees only. Note that the copyright of manuscripts published in the journal after January 1, 2018, is retained by the authors.

4. Copyright (For Articles Published before 2018)
The copyright of manuscripts published in the journal before 2018 belongs to the MSJ.

5. Electronic Format
Authors are strongly encouraged to use the JMSJ Word or LaTeX template files to prepare their manuscripts. The preferred file format for initial submission is Word or PDF. All figures and tables and the abstract should be included in the same file. Manuscripts that exceed the file limitation specified by ScholarOne will be rejected automatically. During the review process, publication-quality resolution is not needed; high resolution files will be required upon acceptance for publication. Upon acceptance, the author should submit final text and figures in separate files. The final text should be a Word or LaTeX file and the tables and figures should be TIFF, JPEG, PSD, EPS, or GIF files. High-resolution, print-quality files should have a resolution of 600-1200 dpi. Color images should be saved in CMYK mode, not RGB. In special cases, authors may contact the Editorial Office to ask alternative methods for submission of the final files.

5. Cover Letter
The manuscript file must be submitted with a cover letter, which should contain the full title of the manuscript; the full names and affiliations of all authors; and the name, e-mail address, telephone and fax numbers of the corresponding author. Authors can provide the Editor in charge with suggestions of up to 5 potential reviewers, with their e-mail addresses, in their cover letter or during the ScholarOne submission process. The Editor in charge reserves the right to determine the final selection of manuscript reviewers.

6. Keywords
Authors should list 1-5 keywords directly under the abstract which describe the topic of the manuscript. Keywords are also used for the Subject Index, which is included in the last issue of each volume of
JMSJ.

In picking keywords, please follow the guidelines below:
(1) Select meteorological terms or phrases that clarify the characteristics of the article. Authors may choose terms from the following MSJ glossary:
http://www.metsoc.jp/member_pages/yogo_temp/ej.htm
(2) A proper noun may be selected when commonly used.
(3)Abbreviations in less common use should be avoided. In such cases, the abbreviation should be spelled out in full after first use.
(4)Select definitive terms instead of extremely common terms (e.g., "cloud resolving simulation" instead of "simulation").
(5) Avoid extremely long terms.
(6) Use lowercase except for proper nouns.
(7) Provide the singular noun (e.g., "wave" instead of "waves").

7. Supplementary Material
Supplemental material is material that is not essential to the article itself but may be published online-only. Up to 4 items of supplementary material, such as larger figures and animations, may be added with appropriate numbers specified in the text for additional information. The maximum total file size including manuscript files is 50MB. The Japanese abstract will be added to the supplementary material.

8. Japanese Abstract
Each accepted manuscript requires a Japanese abstract, which is published online as supplementary material in the journal and is printed separately in Tenki, a monthly bulletin of the MSJ. For non-Japanese contributors, these abstracts will be supplied by the JMSJ Editor after acceptance. If the authors include a Japanese co-author, a Japanese abstract must be prepared by the authors; a separate page should be included at the end of the manuscript and should include Japanese versions of the title, author names, and abstract. The Japanese abstract must correspond with the English abstract and must be submitted to ScholarOne during the initial manuscript submission. For further help preparing the Japanese abstract, please see the template file for a Japanese abstract (Word file).

9. Length Limits
The length of the manuscripts should not exceed 18,000 words for an Article and 4,500 words for Notes and Correspondence (approximately 60 and 15 double-spaced pages formatted using the JMSJ Word template, respectively). The manuscript should be double spaced in 12 point type, and all pages and lines must be numbered consecutively. The word limit does not include the title page, abstract,
acknowledgements, references, tables, or figure captions.

10. Manuscript Style

Manuscripts should follow the style described below. A sample template file is available on the JMSJ web site (http://jmsj.metsoc.jp/instructions.html).

a) Title page: The title, author names, affiliations, and corresponding author’s address must be included on the title page. The title concisely expresses the topic(s) of research. As a rule, authors should use general vocabulary understood in meteorology and avoid the use of uncommon abbreviations. If the title is judged inappropriate during the peer review or editing processes, the authors may be asked to revise it. Authors should capitalize the first letter of all words (except prepositions, articles and conjunctions) in the title, and should provide their names with given name first and family name in all caps.

b) Abstract: A short and concise abstract of no more than 300 words must be included on the second page of the manuscript. Explanations should be given when using uncommon technical terms. For a case study, the authors should avoid redundant descriptions of particular phenomena, and instead describe a universal mechanism obtained from the case study. If the authors use abbreviations, they should be fully spelled out at the first use in the Abstract, and then used in their abridged form. In principle, the authors should not cite references in the abstract except when absolutely necessary.

c) Keywords: List 1-5 keywords that are related to the topic of the manuscript. See Section 3.6 of Submission Guidelines.

d) Corresponding author: The corresponding author is the co-author who takes primary responsibility for communicating with the journal during the submission, peer review, and publication process. The corresponding author also acts as the main contact on the published paper. The corresponding author is not necessarily the first author or the main contributor of the paper. If the paper is accepted, the original corresponding author may nominate another co-author to act as the contact person on the published paper.

e) Text: The text should be divided into sections, each with a separate heading and consecutive numbering. Section headings should be written on a separate line, e.g.,

1. Primary heading
   1.1 Secondary heading
      a. Tertiary heading
      1) Quaternary heading
      (i) Quinary heading

Mathematical formulas and equations should be written clearly in the text with ample space above and below.
f) Supplementary material: Supplementary material must be explained in the manuscript.

g) Acknowledgments: Funding sources should be provided.

h) Appendices: Lengthy mathematical analyses or lists of symbols should normally be put into an 
appendix. When there are two or more appendices, they should be identified as Appendix A, 
Appendix B, and so on.

i) References: References should be arranged alphabetically by authors’ names, without numbering. 
The first author’s name is listed by surname followed by the initials of given names, and 
subsequent names are listed by the initials of given names followed by surname. Journal titles 
should be abbreviated. If the article is written in a language other than English, it should be 
described as “(in Japanese)”, for example. Quoting manuscripts under review or before 
submission is discouraged. References to manuscripts that have not yet been accepted should be 
noted as “Submitted” after the journal’s title, and references to be accepted but not yet published 
manuscripts should be noted as “in press”. In the list of references, each reference must be 
complete in the following form.

i. For articles: Author(s), year: Title of article. *Title of journal (abbreviated)*, **volume number**, 
first page-last page.

ii. For articles without page numbers: Author(s), year: Title of article. *Title of journal 
(abbreviated)*, **volume number**, paper number, DOI number.

iii. For books: Author(s), year: Title of book. Publisher, total pages.

iv. For book collectively written or partially written: Author(s), year: Title of chapter. *Title of 
book*, editor(s)(ed. or eds.), Publisher, country, first page-last page.

v. The citation of references should be as “according to Okada (1921)” or “as shown by earlier 
studies (Fujiwhara 1923; Horiguchi 1928).” When there is more than one article by the same 
author(s) in the same year, append letters after the year (e.g., “Fujiwhara 1923a, 1923b”).

j) Figure legends: Numbered figure legends, which adequately explain the figures, should be placed 
after the reference list. Submitted manuscripts should include figure legends at the bottom of 
respective figure pages for reviewers’ convenience. When the final manuscript is submitted, the 
figure legends should be removed from the figure pages, and only the figure number should remain 
in the upper right corner (e.g., “Fig. 3”). When a figure is quoted in the text, it should be written 
in the shortened form (e.g., “Fig. 1”), except at the beginning of a sentence (e.g., “Figure 1”). If a 
figure is divided into several parts, the author should identify them as “Fig. 1a” and not “Fig. 1(a)”. 
Two or more figures should be referred to as “Figs. 1 and 2”. In an Appendix, figures should be 
identified as “Fig. A1”, “Fig. B3” and so on.

k) Table legends: Numbered table legends, which adequately explain the tables, should be placed 
after the figure legends. Submitted manuscripts should include table legends at the bottom of 
respective table pages for reviewers’ convenience. However, when the final manuscript is
submitted, the table legends should be removed from the table pages, and only the table number should remain in the upper right corner (e.g., “Table 3”). Tables should be quoted in the text as “Table1” and should not be abbreviated. In an Appendix, tables should be identified as “Table B3” and so on.

11. Important Matters to be Considered in Writing

a) Mathematical formula: Authors should describe complex formula on separate lines. When a formula is a part of a sentence, a comma or a period at the end of the formula is needed. When a formula is quoted, parentheses should be applied to its number, and marked such as “Eq. (1)”, “(1)”, “Eqs. (1)-(3)”, or “(1)-(3)”. Authors may omit “Eq.” and “Eqs.”, but should maintain a consistent style throughout the manuscript. “Equation” should be written in full at the beginning of a sentence. In an Appendix, authors should designate equations as “Eq. (A1)”, “Eq. (B3)” and so on.

b) Date and time: Do not use the shortened form to express months except in figures. Coordinated Universal Time (UTC) is used to express Universal Time; Greenwich Mean Time (GMT) and (Z) are not used. To show the daily variation in a particular region, the use of Local Standard Time (LST) is permitted.

c) Unit: As a rule, international units (SI) should be used but units commonly used in meteorology and oceanography are also permitted. Unit should be presented in roman type. Use superscript indices rather than slash marks, and put a space between different units (e.g., use m s\(^{-1}\) rather than m/s or ms\(^{-1}\)).

4. Procedure after Acceptance

1. Notice of manuscript acceptance
Authors will be notified of manuscript acceptance via ScholarOne by the Chief Editor.

2. Submission of Author Form and Final Files
The Editorial Office will send a notification of acceptance and Author Form to the corresponding author. The author should return the complete Author Form, which details the preferred postal address and the reprint order. The author should submit the electronic files (see Section 3.4) of the final accepted manuscript immediately. At this stage, the author should not make any changes or corrections to the manuscript unless directed to by the Editorial Committee.

3. Galley Proofreading
Authors will receive galley proofs about two months after manuscript acceptance, and corrections should be returned within one week. Authors who expect to be away at this time should notify the
Editorial Office of their absence and the contact method to be used during this period. If galley proofreading is delayed, the publication of the article may be postponed.

4. Article Processing Charge (APC)
Publishing scholarly journals comes with many costs, such as those of managing peer review, copy editing, typesetting and online hosting. To cover these costs in the absence of other income sources such as subscriptions, authors (or their institutions) are requested to pay an article processing charge (APC), as detailed below. There is no submission fee.

<table>
<thead>
<tr>

<td>¥170,000</td>
<td>No charge</td>
</tr>
</tbody>
</table>

(plus local consumption tax where applicable)
*Notes and Correspondence **Invited Review Articles

5. APC Waiver Policy
The journal will waive the APC on an article if no authors have a professional affiliation with a research organization or if all authors are based in a "Least Developed Country" or "Other Low Income Country" on the OECD’s qualifying country list. Other waivers will be considered on a case-by-case basis by the journal’s Editorial Office. Authors must apply for a waiver before or upon the submission of their manuscript; applications will not be considered after the review process has started. Applications may be made by emailing the journal at jmsj@metsoc.jp and must include evidence of financial hardship.

The ability of an author to pay the APC does not influence editorial decisions. To avoid any possibility of undue influence, editors involved with the decision-making process on submitted manuscripts are not involved in any deliberations on waivers.

6. Reprints
Authors will receive 30 reprints free of charge. Additional reprints with or without the journal cover may be ordered at the price listed on the Author Form.
